(54) Title: A SURGICAL ACCESS DEVICE

(57) Abstract

Surgical device (1) is for use in minimally invasive surgery using an inflated body cavity (2) accessible to a surgeon through the device (1) surrounding an incision in a patient's abdominal wall (3). The device engages with the cavity (2) by an anchor ring (5) and is held in position on the patient's skin by an adhesive web (6). The device (1) is sealed by a liquid filled cell (8) connected between the anchor ring (5) and the web (6). The web (6) has a connector ring (7) for additional seals and/or for holding or guiding medical instruments into position.
